

# Reclaimed Wood Tealight holders

## Care Instructions

THANK YOU for purchasing one of our stunning and unique products. We hope you get many years of use and pleasure from it.

Your tealight holders are a unique product made from reclaimed wood.

Reclaimed wood has been cleaned, planed and cut to shape.

Each piece comes from a limited batch using various woods with unique grain and colours.

The tealight holders have been finished with a 100% natural Beeswax based coating to keep them protected.

### Care of Your Tealights

Simply wipe clean with a damp, not wet, cloth. Avoid using harsh cleaning products, but a little soap is ok if absolutely needed. Immediately dry with a separate, soft, lint-free cloth. It's that simple.

The tealight holders may need "Buffing" with a soft cloth restore the evenness of the satin wax finish which can be dulled during storage and transport.

Occasional re-waxing will return the finish to good as new.

We think it's best not to use fossil fuel based mineral oil, which is why we used a coconut oil and beeswax.

**Colour Change** – All wood products will change in shade slightly as its exposed to sunlight. This is perfectly normal.

Handcrafted unique & original wood and resin creations
